SECTION 2. Hazards identification.		
2.1. Classification of the substance or mixture.		Chardend (UOD) (20.055 (2010 (2020) T
The product is classified as hazardous pursuant to the	provisions set forth in USHA Hazard Communication	Standard (HCS) (29 CFR 1910.1200). The

product thus requires a safety datasheet. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Classification and Hazard Statement. Skin corrosion, category 1B Serious eye damage, category 1 Specific target organ toxicity - single exposure, category 3

Signal words:

Danger

Causes severe skin burns and eye damage. Causes serious eye damage. May cause respiratory irritation.

Hazard statements:

P260     Do not breather dust / fume / gas / mist / vapours / spray.       P274     Wash in throughly dare handling.       P271     Use only outdoors or in a well-ventilated area.       P280     Wear protective gloox / protective outhing. / expontection / face protection.       Response:     IF INHALED: remove show in an outh. Do not induce voniting.       P304-P330     IF INHALED: remove person to free har in and keep controltable for breathing.       P304-P331     IF INHALED: remove person to free har in and keep controltable for breathing.       P304-P330     IF INHALED: remove person to free har in and keep controltable for breathing.       P304-P330     IF INHALED: remove person to free har in and keep controltable for breathing.       P304-P330     IF INHALED: remove person to free har in and keep controltable for breathing.       P304-P330     Specific treatment (see label).       P305     Specific treatment (see label).       P305     Store locked up.       P305     Store locked up.       P306     Store locked up.       P305     Store locked up.       P405     Store locked up.       P306     Bisposel       P405     Store locked up.       P306     Bispose of contents / container tightly closed.       P405     Store locked up.       P306     Bispose of contents / container to an approved waste disposal plant.       P20<		EXAXOL CHEMICAL CORPORATION	Revision nr. 1 Dated 2/7/2015
H335       May cause respiratory initiation.         Precautionary statements:         Precautionary statements:         Precautionary statements:         P361       Do not breathe dust / fume / gas / mist / vapours / spray.         P364       Wash skin thronughly after handling.         P361       Use only outdoors or in a well-ventilated area.         P361       JE SWALLOWED: rinse mouth. Do not induce vontiling.         P301+7330+731       IF SWALLOWED: rinse mouth. Do not induce vontiling.         P301+7330+731       IF SWALLOWED: rinse mouth. Do not induce vontiling. EXAXOL CHEMICAL CORPORATION	Revision nr. 1
	Dated 2/7/2015
A0066 - Ammonium Hydroxide 28%	Printed on 7/10/2015
	Page n. 3/13

Additional hazards.

### **SECTION 3. Composition/information on ingredients.**

### 3.1. Substances.

Contains:

The full wording of hazard (H) phrases is given in section 16 of the sheet.

Identification.	Conc. %.	Classification:
AMMONIA		
CAS. 1336-21-6	100	Skin corrosion, category 1B H314, Specific target organ toxicity - single exposure, category 3 H335, Hazardous to the aquatic environment, acute toxicity, category 1 H400 M=1
3.2. Mixtures.		

3.2. Mixtures.

Information not relevant.

### **SECTION 4. First aid measures.**

#### 4.1. Description of first aid measures.

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention.

INGESTION: Have the subject drink as much water as possible. Get medical advice/attention. Do not induce vomiting unless explicitly authorised by a doctor.

INHALATION: Get medical advice/attention immediately. Remove victim to fresh air, away from the accident scene. If the subject stops breathing, administer artificial respiration. Take suitable precautions for rescue workers.

### 4.2. Most important symptoms and effects, both acute and delayed.

For symptoms and effects caused by the contained substances, see chap. 11.

4.3. Indication of any immediate medical attention and special treatment needed.

Information not available.

## **SECTION 5. Firefighting measures.**

5.1. Extinguishing media.

Revision nr. 1

## A0066 - Ammonium Hydroxide 28%

Dated 2/7/2015

Printed on 7/10/2015 Page n. 4/13

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

### 5.2. Special hazards arising from the substance or mixture.

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Do not breathe combustion products.

### 5.3. Advice for firefighters.

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

### **SECTION 6.** Accidental release measures.

### 6.1. Personal precautions, protective equipment and emergency procedures.

### Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

### 6.2. Environmental precautions.

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3. Methods and material for containment and cleaning up.

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

# SECTION 7. Handling and storage.

Revision nr. 1

## A0066 - Ammonium Hydroxide 28%

Dated 2/7/2015 Printed on 7/10/2015

Page n. 5/13

### 7.1. Precautions for safe handling.

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

### 7.2. Conditions for safe storage, including any incompatibilities.

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

### 7.3. Specific end use(s).

Information not available.

### **SECTION 8. Exposure controls/personal protection.**

### 8.1. Control parameters.

Regulatory References:

TLV-ACGIH ACGIH 2014

#### AMMONIA Threshold Limit

Threshold Limit Value. Type	Country	TWA/8h		STEL/15min	
		mg/m3	ppm	mg/m3	ppm
TLV-ACGIH	-	17	25	24	35

### 8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice. Personal protective equipment must comply with current regulations.

### HAND PROTECTION

Protect hands with category III work gloves (OSHA 29 CFR 1910.138).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

### SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

### EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133).

### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a NIOSH certified filter, whose class must be chosen according to the limit of use concentration (NIOSH 42 CFR 84, OSHA 29 CFR 1910.134). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required. Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear

Revision nr. 1

Dated 2/7/2015 Printed on 7/10/2015

Page n. 6/13

open-circuit compressed air breathing apparatus or external air-intake breathing apparatus. For a correct choice of respiratory protection device, see standard NIOSH 42 CFR 84 and OSHA 29 CFR 1910.134.

ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

### **SECTION 9.** Physical and chemical properties.

### 9.1. Information on basic physical and chemical properties.

Appearance Colour Odour Odour threshold. pH. Melting point / freezing point. Initial boiling point. Boiling range. Flash point. Evaporation Rate Flammability of solids and gases Lower inflammability limit. Upper inflammability limit. Upper explosive limit. Upper explosive limit. Vapour pressure. Vapour density Relative density. Solubility Partition coefficient: n-octanol/water Auto-ignition temperature. Decomposition temperature. Viscosity Explosive properties Oxidising properties	Not available. Not available.
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### 9.2. Other information.

Information not available.

## **SECTION 10. Stability and reactivity.**

### 10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

AMMONIA: corrodes aluminium, iron, zinc, copper and their alloys.

### 10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

Revision nr. 1

## A0066 - Ammonium Hydroxide 28%

Dated 2/7/2015

Printed on 7/10/2015 Page n. 7/13

### 10.3. Possibility of hazardous reactions.

No hazardous reactions are foreseeable in normal conditions of use and storage.

AMMONIA: risk of explosion on contact with strong acids and iodine. Can react dangerously with strong bases .

### 10.4. Conditions to avoid.

None in particular. However the usual precautions used for chemical products should be respected.

### 10.5. Incompatible materials.

AMMONIA: silver, lead, zinc and their salts; hydrochloric acid, nitric acid, oleum, halogens, acrolein, nitromethane and acrylic acid.

## 10.6. Hazardous decomposition products.

AMMONIA: nitric oxides.

# **SECTION 11. Toxicological information.**

### 11.1. Information on toxicological effects.

This product is corrosive and causes serious burns and vesicles on the skin, which can arise even after exposure. Burns are very stinging and painful. Upon contact with eyes, it may cause serious harm, such as cornea opacity, iris lesions, irreversible eye coloration. The vapors and/or powders are caustic for the respiratory system and may cause pulmonary edema, whose symptoms sometimes arise only after some hours. Exposure symptoms may include: sting, cough, asthma, laryngitis, respiratory disorders, headache, nausea and sickness.

If swallowed, it may cause mouth, throat and oesophagus burns, sickness, diarrhoea, edema, larynx swelling and, consequently, asphyxia. Perforation of the gastro-intestinal tract is also possible.

This product may cause serious ocular lesions, cornea opacity, iris lesions, irreversible eye coloration.

Acute effects: inhalation of this product may irritate the lower and upper respiratory tract and cause cough and respiratory disorders; at higher concentrations it can also cause pulmonary edema. Ingestion may cause health problems, including stomach pain and sting, nausea and sickness.

AMMONIA LD50 (Oral).350 mg/kg Rat

# **SECTION 12. Ecological information.**

This product is dangerous for the environment and highly toxic for aquatic organisms. **12.1. Toxicity.** 

AMMONIA LC50 - for Fish.

EC50 - for Crustacea.

47 mg/l/96h Channa punctata 20 mg/l/48h Daphnia magna

12.2. Persistence and degradability.

Biodegradability: Information not available.

### 12.3. Bioaccumulative potential.

Information not available.

### 12.4. Mobility in soil.

Information not available.

### 12.5. Results of PBT and vPvB assessment.

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

#### 12.6. Other adverse effects.

Information not available.

### **SECTION 13. Disposal considerations.**

### 13.1. Waste treatment methods.

Reuse, when possible. Neat product residues should be considered special non-hazardous waste. Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. Waste transportation may be subject to dangerous goods transport regulations. CONTAMINATED PACKAGING Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

### **SECTION 14. Transport information.**
