G26	91 - Gentian Violet 1% Indicator in Methanol	Printed on 3/31/2021
		Page n. 2/14
Eye irritation, category 2	Causes serious eye irritation.	
Signal words:	Danger	
Hazard statements:		
H225	Highly flammable liquid and vapour.	
H351	Suspected of causing cancer.	
H301+H311+H331 H370	Toxic if swallowed, in contact with skin or if inhaled. Causes damage to organs.	
H319	Causes serious eye irritation.	
Precautionary statements:		
Prevention:		
P210 P260	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No	smoking.
P202	Do not breathe dust / fume / gas / mist / vapours / spray. Do not handle until all safety precautions have been read and understood.	
P242	Use only non-sparking tools.	
P201	Obtain special instructions before use.	
P280 P270	Wear protective gloves/ protective clothing / eye protection / face protection. Do not eat, drink or smoke when using this product.	
P271	Use only outdoors or in a well-ventilated area.	
P264	Wash skin thoroughly after handling.	
P240 P243	Ground / bond container and receiving equipment. Take precautionary measures against static discharge.	
P241	Use explosion-proof electrical / ventilating / lighting / / equipment.	
Response:		
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if rinsing.	
P303+P361+P353 P301+P310	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with wa IF SWALLOWED: immediately call a POISON CENTER / doctor.	ater / shower.
P311 P312	Call a POISON CENTER / doctor. Call a POISON CENTER / doctor / / if you feel unwell.	
P337+P313	If eye irritation persists: Get medical advice / attention.	
P304+P340	IF INHALED: remove person to fresh air and keep comfortable for breathing.	
P330 P302+P352	Rinse mouth. IF ON SKIN: wash with plenty of water.	
P361+P364	Take off immediately all contaminated clothing and wash it before reuse.	
P370+P378	In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.	
Storage: P403+P235	Store in a well-ventilated place. Keep cool.	
P403+P233	Store in a well-ventilated place. Keep container tightly closed.	
P405	Store locked up.	
Disposal: P501	Dispose of contents / container to an approved waste disposal plant.	
The mixture contains		
1.00%;1.00% of		
components of unknown acute inhalation / dermal		
toxicity.

# 4. First-aid measures

### 4.1. Description of first aid measures

Revision nr. 1

Dated 3/29/2021 First compilation

## Printed on 3/31/2021

#### Page n. 4/14

## G2691 - Gentian Violet 1% Indicator in Methanol

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

#### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

## 5. Fire-fighting measures

#### 5.1. Extinguishing media

#### SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

#### 5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

#### 5.3. Advice for firefighters

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

### 6. Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

### 6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3. Methods and material for containment and cleaning up

Revision nr. 1 Dated 3/29/2021

# First compilation

## Printed on 3/31/2021

### Page n. 5/14

## G2691 - Gentian Violet 1% Indicator in Methanol

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

#### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## 7. Handling and storage

#### 7.1. Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. When performing transfer operations involving large containers, connect to an earthing system and wear antistatic footwear. Vigorous stirring and flow through the tubes and equipment may cause the formation and accumulation of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised. Do not eat, drink or smoke during use. Avoid leakage of the product into the environment.

#### 7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

#### 7.3. Specific end use(s)

Information not available

## 8. Exposure controls/personal protection

#### 8.1. Control parameters

Page n. 6/14

Legend:

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.

#### 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must comply with current regulations.

#### HAND PROTECTION

Protect hands with category III work gloves (OSHA 29 CFR 1910.138).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

#### SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear. Wash body with soap and water after removing protective clothing.

#### EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133).

#### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a NIOSH certified filter, whose class must be chosen according to the limit of use concentration (NIOSH 42 CFR 84, OSHA 29 CFR 1910.134). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus or external air-intake breathing apparatus. For a correct choice of respiratory protection device, see standard NIOSH 42 CFR 84, OSHA 29 CFR 1910.134.

#### ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

°F)

## 9. Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

#### 9.2. Other information

Information not available

## 10. Stability and reactivity

#### 10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

#### 10.2. Chemical stability

The product is stable in normal conditions of use and storage.

#### 10.3. Possibility of hazardous reactions

The vapours may also form explosive mixtures with the air.

#### 10.4. Conditions to avoid

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

#### METHANOL

Avoid exposure to: heat, flames and sparks.

### 10.5. Incompatible materials

METHANOL

Incompatible with: acid chlorides, acid anhydrides, oxidising agents, alkaline metals, reducing agents, acids.

## 10.6. Hazardous decomposition products

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

# 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological
