EXAXOL CHEMI	CAL CORPORATION	Revision nr. 1 Dated 23/2/2016
S6637 - Sulfide Star	idard 1000ppm in Water	Printed on 2/23/2016 Page n. 1/11
Safety data sheet according to U.S.A. Federal Hazcom 2012		
SECTION 1. Identification of the subs	stance/mixture and of the company/u	ndertaking
<b>1.1. Product identifier</b> Code: Product name	S6637 Sulfide Standard 1000ppm in Water	
1.2. Relevant identified uses of the substance or m Intended use For Laboratory Use C		
<b>1.3. Details of the supplier of the safety data sheet</b> Name Full address District and Country	EXAXOL CHEMICAL CORPORATION 14325 60 TH ST N 33760 CLEARWATER - FLORIDA US Tel. 1-727-524-7732 Fax 1-727-532-8221	
e-mail address	info@exaxol.com	
<b>1.4. Emergency telephone number</b> For urgent inquiries refer to	1-800-255-3924 ChemTel Inc.	
SECTION 2. Hazards identification.		
2.1. Classification of the substance or mixture.		
The product is not classified as hazardous pursuant to the provisions set forth in OSHA Hazard Communication Standard (HCS) (29 CFR 1910.1200). However, since the product contains hazardous substances in concentrations such as to be declared in section no. 3, it requires a safety data sheet with appropriate information.		
Signal words:		
Hazard statements:		
Precautionary statements:		

	EXAXOL CHEMICAL CORPORA	TION Revision nr. 1	
		Dated 23/2/20	16
	S6637 - Sulfide Standard 1000ppm i	in Water Printed on 2/23	8/2016
		Page n. 2/11	
Prevention:			
Response:			
Storage:			
 Disposal:			
-			
2.2. Other hazards.			
Environmental classific	ation as for Reg. (EU) 1272/2008 (CLP):		
The product is classifie	d as hazardous for environment pursuant to the provisions	s set forth in EC Regulation 1272/2008 (CLP).	
Classification and Haza Hazardous to the aqu		Harmful to aquatic life with long lasting effects.	
Hazard statements:			
H412	Harmful to aquatic life with long lasting effects.		
Precautionary stateme	nts:		
Prevention: <b>P273</b> Response:	Avoid release to the environment.		
 Storage:			
 Disposal: <b>P501</b>	Dispose of contents / container to an approved wast	te disposal plant.	
Additional hazards.			

# SECTION 3. Composition/information on ingredients.

3.1. Substances.

Information not relevant.

### 3.2. Mixtures.

Contains:

Identification.	Conc. %.	Classification:
WATER		
CAS. 7732-18-5	50 - 100	
Sodium Sulfide Nonahydrate		
CAS. 1313-84-4	0.5 - 1	

Note: Upper limit is not included into the range.

S6637 - Sulfide Standard 1000ppm in Water

Revision nr. 1 Dated 23/2/2016

Printed on 2/23/2016 Page n. 3/11

The full wording of hazard (H) phrases is given in section 16 of the sheet.

### **SECTION 4. First aid measures.**

### 4.1. Description of first aid measures.

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention.

INGESTION: Have the subject drink as much water as possible. Get medical advice/attention. Do not induce vomiting unless explicitly authorised by a doctor.

INHALATION: Get medical advice/attention immediately. Remove victim to fresh air, away from the accident scene. If the subject stops breathing, administer artificial respiration. Take suitable precautions for rescue workers.

#### 4.2. Most important symptoms and effects, both acute and delayed.

For symptoms and effects caused by the contained substances, see chap. 11.

#### 4.3. Indication of any immediate medical attention and special treatment needed.

Information not available.

### **SECTION 5. Firefighting measures.**

### 5.1. Extinguishing media.

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

#### 5.2. Special hazards arising from the substance or mixture.

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Do not breathe combustion products.

#### 5.3. Advice for firefighters.

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations. SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

# Revision nr. 1

Dated 23/2/2016 Printed on 2/23/2016

Page n. 4/11

# **SECTION 6.** Accidental release measures.

### 6.1. Personal precautions, protective equipment and emergency procedures.

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

### 6.2. Environmental precautions.

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3. Methods and material for containment and cleaning up.

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

#### 6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

# **SECTION 7. Handling and storage.**

### 7.1. Precautions for safe handling.

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

### 7.2. Conditions for safe storage, including any incompatibilities.

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

### 7.3. Specific end use(s).

Information not available.

# SECTION 8. Exposure controls/personal protection.

## 8.1. Control parameters.

Information not available.

### 8.2. Exposure controls.

Revision nr. 1

# S6637 - Sulfide Standard 1000ppm in Water

Dated 23/2/2016 Printed on 2/23/2016

Page n. 5/11

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

#### HAND PROTECTION

Protect hands with category III work gloves (OSHA 29 CFR 1910.138).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

#### SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

### EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133).

#### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a NIOSH certified filter, whose class must be chosen according to the limit of use concentration (NIOSH 42 CFR 84, OSHA 29 CFR 1910.134). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus or external air-intake breathing apparatus. For a correct choice of respiratory protection device, see standard NIOSH 42 CFR 84 and OSHA 29 CFR 1910.134.

### ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

## **SECTION 9.** Physical and chemical properties.

#### 9.1. Information on basic physical and chemical properties.

Appearance Colour Odour Odour threshold. pH. Melting point / freezing point. Initial boiling point. Boiling range. Flash point. Evaporation Rate Flammability of solids and gases Lower inflammability limit. Upper inflammability limit. Upper inflammability limit. Lower explosive limit. Upper explosive limit. Vapour pressure. Vapour density Relative density. Solubility Partition coefficient: n-octanol/water Auto-ignition temperature. Decomposition temperature. Viscosity Explosive properties	Not available. Not available.

Oxidising properties Not available.	
9.2. Other information.	
Information not available.	
SECTION 10. Stability and reactivity.	
10.1. Reactivity.	
There are no particular risks of reaction with other substances in normal conditions of use.	
10.2. Chemical stability.	
The product is stable in normal conditions of use and storage.	
10.3. Possibility of hazardous reactions.	
No hazardous reactions are foreseeable in normal conditions of use and storage.	
10.4. Conditions to avoid.	
None in particular. However the usual precautions used for chemical products should be respected.	
10.5. Incompatible materials.	
Information not available.	
10.6. Hazardous decomposition products.	
Information not available.	
SECTION 11. Toxicological information.	
According to currently available data, this product has not yet produced health damages. Anyway, it industrial practices. This product may have slight health effects on sensitive people, by inhalation and/or and/or ingestion.	must be handled carefully according to good cutaneous absorption and/or contact with eyes
11.1. Information on toxicological effects.	
This product is not considered to be a carcinogen by IARC, ACGIH, NTP, and OSHA.Information not availa SECTION 12. Ecological information.	able.

This product is dangerous for the environment and the aquatic organisms. In the long term, it have negative effects on aquatic environment. **12.1. Toxicity.** Information not available.

### 12.2. Persistence and degradability.

Information not available.

### 12.3. Bioaccumulative potential.

Information not available.

### 12.4. Mobility in soil.

Information not available.

### 12.5. Results of PBT and vPvB assessment.

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

### 12.6. Other adverse effects.

Information not available.

## **SECTION 13.** Disposal considerations.

### 13.1. Waste treatment methods.

Reuse, when possible. Neat product residues should be considered special non-hazardous waste. Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. CONTAMINATED PACKAGING Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

## **SECTION 14. Transport information.**
